

Immunization Policy

IMO Primary Program requires that all parents/guardians of enrolled children provide written documentation of receipt of immunizations appropriate for each child's age. Infants, children, and adolescents should be immunized as specified in the "Recommended Immunization Schedules for Persons Aged 0 Through 18 Years," developed by the Advisory Committee on Immunization Practices of the CDC, the American Academy of Pediatrics, and the American Academy of Family Physicians. Children whose immunizations are not up-to-date or have not been administered according to the recommended schedule should receive the required immunizations, unless contraindicated or for legal exemptions. Failure to do so will result in the child not being able to attend school until immunizations are up-to-date.

Please be advised that some families in attendance have chosen not to immunize their children. Unimmunized Children: If immunizations have not been or are not to be administered because of a medical condition, a statement from the child's primary health care provider documenting the reason why the child is temporarily or permanently medically exempt from the immunization requirements should be on file. If immunizations are not to be administered because of the parents'/guardians' religious or philosophical beliefs, a legal exemption with notarization, waiver, or other state-specific required documentation signed by the parent/guardian should be on file.

The parent/guardian of a child who has not received the age-appropriate immunizations prior to enrollment and who does not have documented medical, religious, or philosophical exemptions from routine childhood immunizations should provide documentation of a scheduled appointment or arrangement to receive immunizations. Parents who have not provided documentation of a scheduled appointment or arrangement to receive immunization at the time of registration will not be allowed to register their child/ren.
